

Polls from eXplore

Which of the following events did you predict correctly in advance to it happening? (you may check more than one)

Great Britain voting to exit the EU (BREXIT) in June 2016.

Donald Trump being elected president of the USA in Nov 2016.

Cobalt prices would double within the last 12 months (\$40k/ton to \$80k/ton)

The revenue from music streaming services exceeding that of either physical or digital downloads in 2017.

The General Data Protection Regulation (GDPR) regulation passing in 27 April 2016.

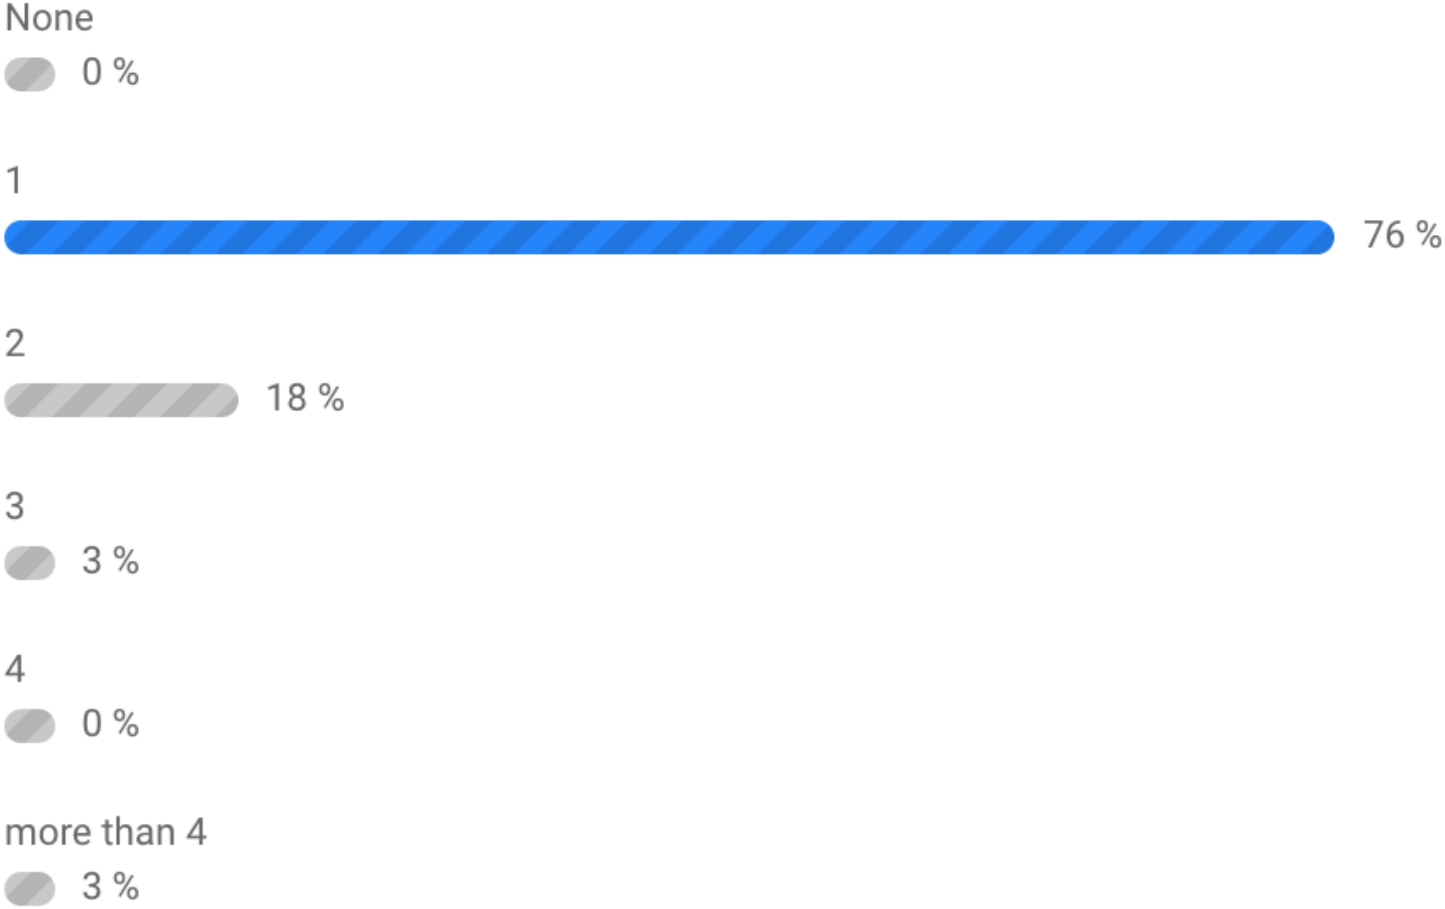

EU economic growth would exceed that of the United States in 2017 (2.5% vs. 2.3%).

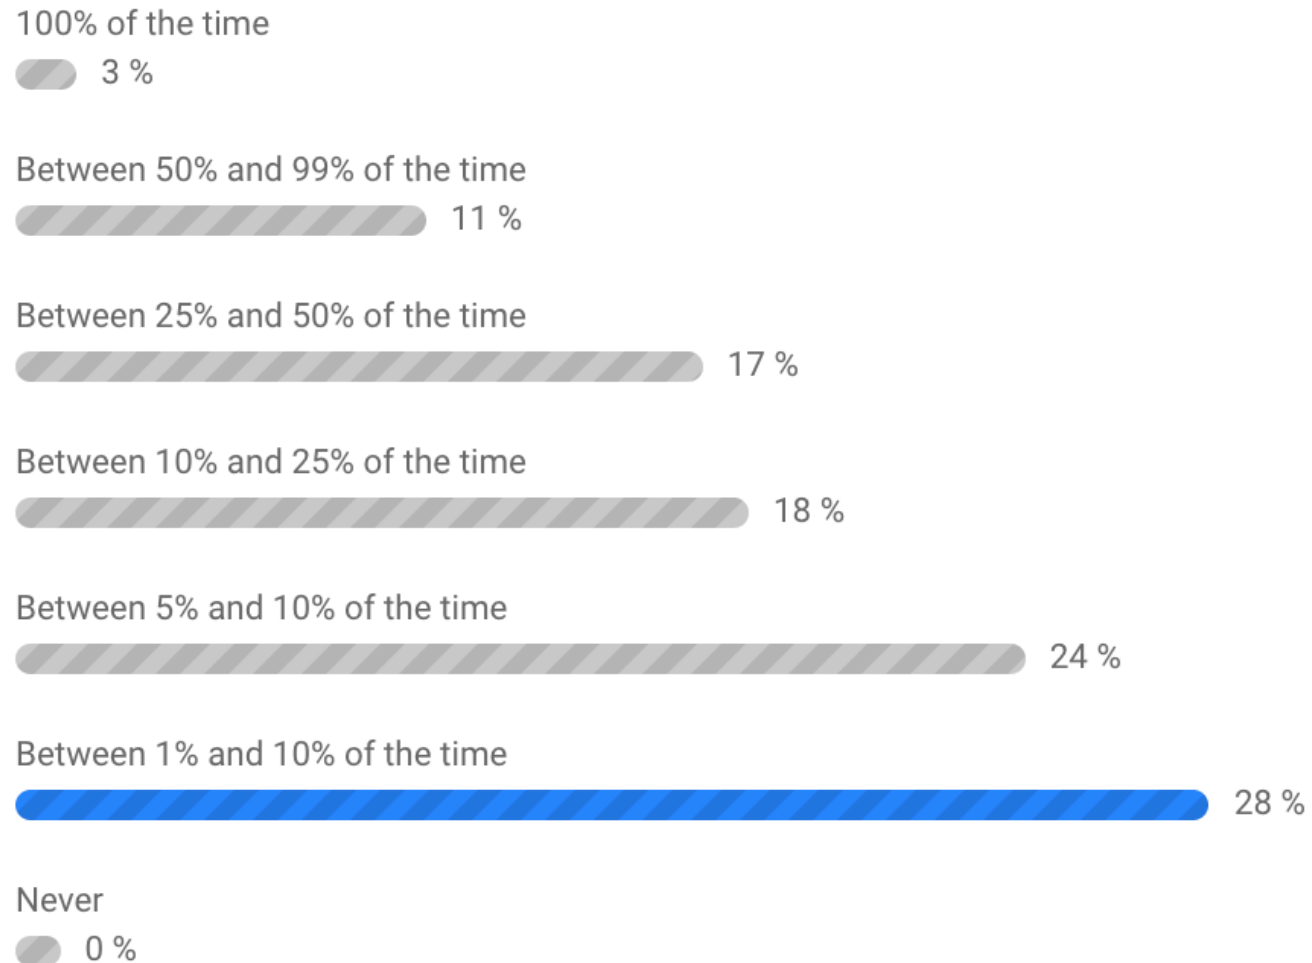

I did not predict any of these

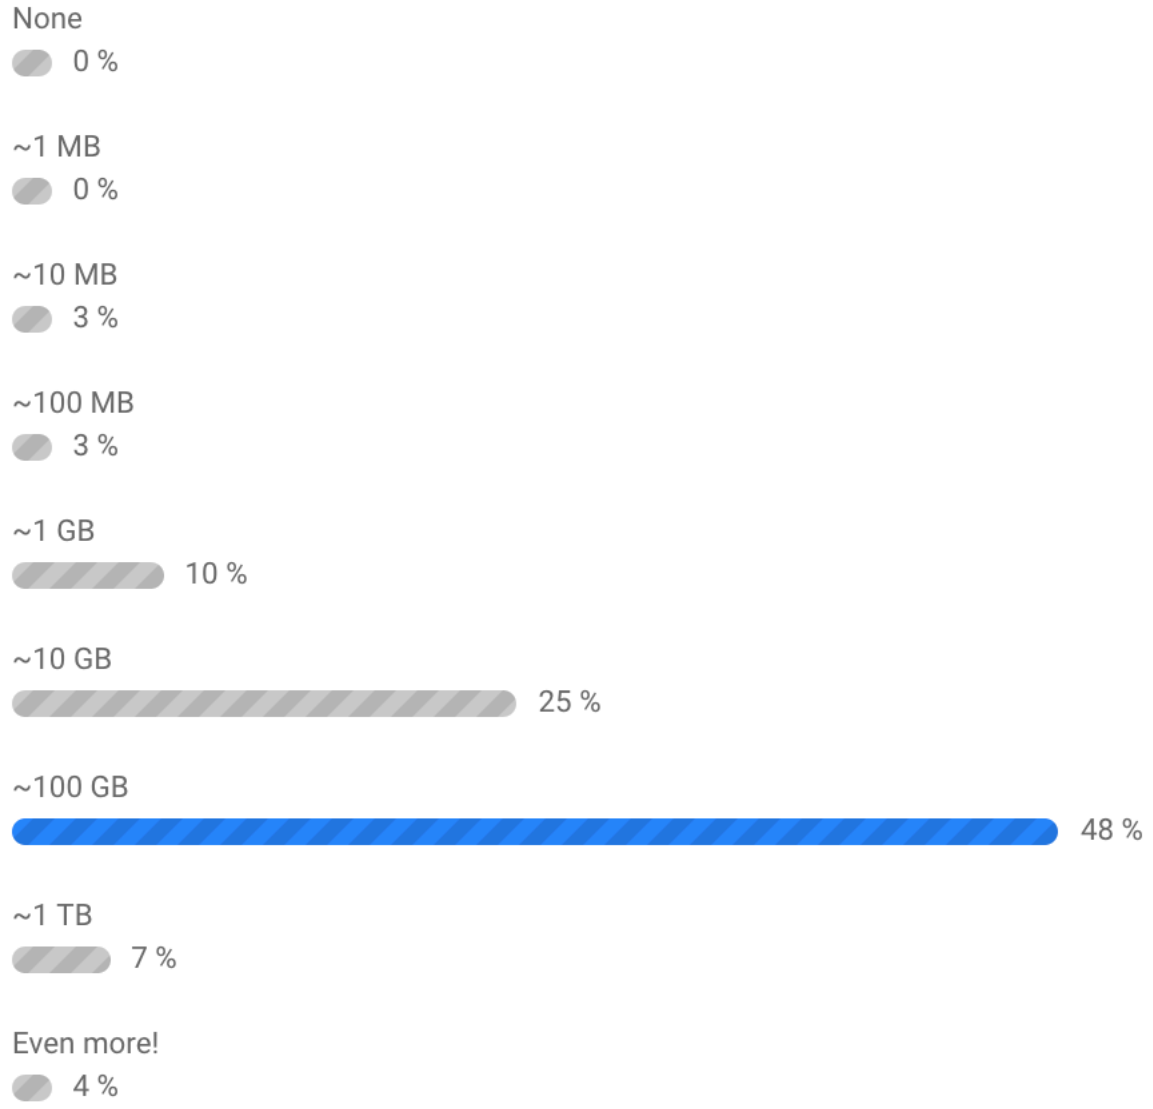

How many smartphones do you have with you right now?

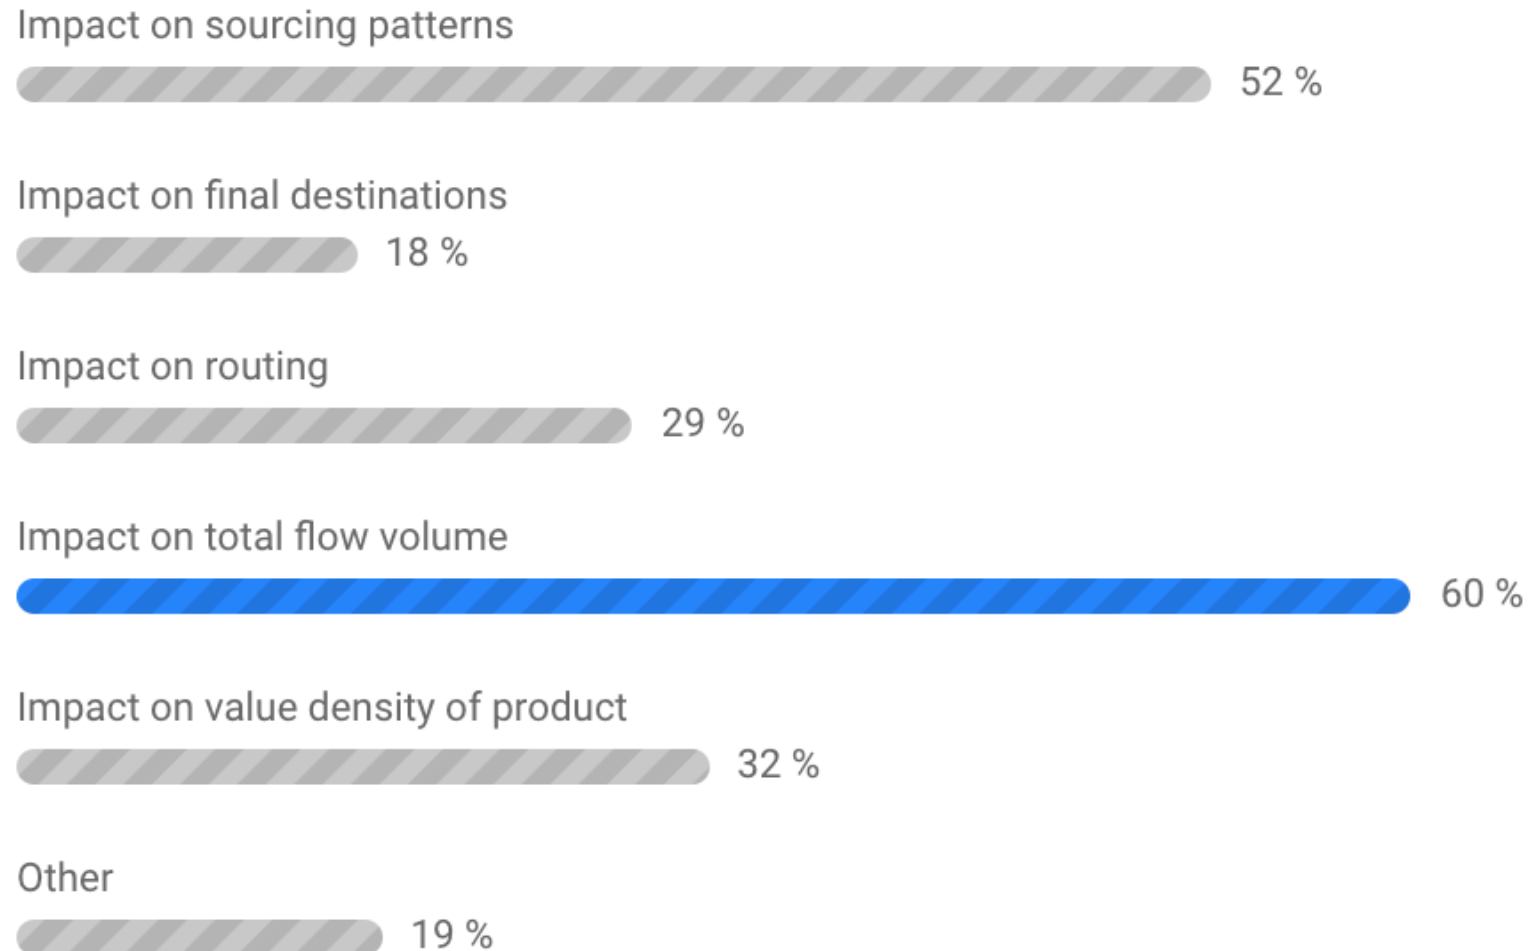

How often do you use your smartphone as an actual phone?

How much data storage do you have with you right now?

For your firm, what is the impact of 3D printing / additive manufacturing? (more than one allowed)

What path will the adoption rate of autonomous vehicles in the EU follow?

Fast adoption within 5-10 years (blue)

Slow initial adoption but full within 20-40 years (white)

Overall slow adoption never surpassing 50% (red)

Other path
