Language: **English**

## WHAT WILL THIS SUPPLY CHAIN FINANCIAL ANALYSIS PROGRAMME COVER?

This programme bridges the gap between finance and supply chain by demonstrating how supply chain actions affect the income statement and the balance sheet—two key financial statements—and showing how supply chain decisions can be translated into financial metrics.

### OVER THE 2 DAY PROGRAMME WE WILL LOOK AT:

- ✓ Activity Based Costing
- ✓ Tradeoff analysis
- ✓ ABC Cost systems
- ✓ Supply Chain Finance
- ✓ Activity Based Costing Case Study
- ✓ Supply Chain Finance Case Study
- ✓ Working Capital in Supply Chains
- ✓ Working Capital activities
- ✓ Cash Conversion Cycle

# Who are **The Presenters?**

## **JAMES B. RICE**

**Deputy Director, MIT Center for Transportation & Logistics**  
**Director, Integrated Supply Chain Management Program**  
**Director, Supply Chain Exchange Program**

Jim Rice joined the MIT Center for Transportation & Logistics (MIT CTL) in 1995 and he was appointed as the Deputy Director of the Center in 2007. In this capacity he oversees several research and outreach programs, MIT CTL Executive Education Programs and outreach marketing activities. Jim serves as the Director of the MIT Integrated Supply Chain Management (ISCM) Program, a collaborative research consortium with industry sponsors. As part of these roles, Jim works with industry sponsors to develop research projects and educational and knowledge sharing events for the sponsors.

## **ANNE LANGE**

**Associate Professor, Luxembourg Centre for Logistics and Supply Chain Management (LCL)**

Anne Lange is an Associate Professor in Logistics and Supply Chain Management at the University of Luxembourg. Her research interests are in transportation, network analysis and supply chain finance. She enjoys to conduct research in cooperation with industry and has done so for example with DB Schenker, DHL and Lufthansa Cargo. Prior to joining the LCL, Anne Lange was an Assistant Professor endowed by DB Schenker at TU Darmstadt. She has received her doctoral degree from the University of Cologne and has been as a PostDoc researcher at TU Eindhoven as well as the University of Cologne.

# What can LCL Executive Education do for your organisation?

We collaborate with companies to create impactful learning experiences that challenge leaders to think more strategically about their supply chains, and develop the skills to overcome present obstacles, anticipate future challenges, and gain competitive advantage.

## TRANSFORMING ORGANISATIONS

Learn how to keep your supply chain attuned to the latest innovations as LCL & MIT faculty, researchers, and industry thought leaders explain how to manage change in today's intensely competitive commercial environment.

## DEVELOPING LEADERSHIP EXPERTISE

Cultivate the skills required of tomorrow's leaders through custom designed programmes that deliver a fast-paced mix of simulations, real world case studies, cutting edge research, and thought-provoking, interactive discussion.

## ENGAGING WITH INDUSTRY LEADERS

Meet, share ideas, and resolve challenges with other leading supply chain professionals.

## NURTURING TALENT

Use our programmes to help retain and develop your supply chain team through professional courses that teach them how to leverage supply chain tools, practices, and capabilities that improve job performance.

# LCL Executive Education

## WHY PARTICIPATE IN AN LCL EXECUTIVE EDUCATION PROGRAMME?

**LCL Executive Education** industry-leading courses bring leading supply chain experts from MIT Boston, and other leading universities to Luxembourg, offering intensive 2-day courses on Supply Chain current topics from industry and academia. The methodology is a mix of simulations, real case studies, research findings and thought-provoking, interactive small-group class sessions making for a stimulating learning environment.

As a young professional, and a graduate in Supply Chain Management and Economics, the LCL Supply Chain Financial Analysis Workshop provided me with the superb opportunity to refresh and extend my knowledge in this area.

The workshop was not only useful from a financial theory perspective but the dynamic exchange of experience and perspectives from all participants with diverse backgrounds and seniorities within the profession was extremely useful. It was fantastic to have academic expertise from MIT available in Luxembourg at the historical university campus at Limpertsberg. I look forward to joining future offerings from the LCL Executive Education portfolio." (Nov. 2017)

**JOHANNES HESSE,**  
Project Coordinator at IEE S.A. and YPL<sup>2</sup> Chairman

We are pleased to have welcomed participants from the following companies and organisations during the 2017-2018 academic year.
